erry's return were not taken seriously. Miss E. Rose, a resident of Bondi, was severely injured in a motor car accident yesterday. She was brought to the hospital after being driven to record her vote. When on Bondi Junction the driver of the car attempted to pass between a tram and a motor cart, but there was not sufficient room, and the car struck the tram. The motor was overturned, and the occupants received a severe shaking. Miss Rose, however, was the only passenger injured. She was attended to by Dr. Gaden, after which she was conveyed to her home suffering from a broken shoulder.

One of the features of the elections was the interest taken by the women. This fact

and the massed crowds of electors for him as their representative. His next thanks were due to his many friends who worked so hard for his return, and his answer would be to merit their confidence. When Gilbert was accorded a great ovation by 10,000 people, and was carried shoulder-high down the street by a body of jubilant men.

Mr. P. V. Piel also thanked his supporters for the greatest surprise to the electors of the Newcastle district was the defeat of Mr. John L. Pegan for Wickham.

The "Pondo," which was
not arrived at Vancouver on Aug. 7, with a cargo of opium valued at \$100 tons. The Pondo left Vancouver on Aug. 9, bound for Seattle, B. C., where it will arrive tomorrow, with a full cargo, and had about lost a large amount of freight offered.

THE INCENDIARY.

The Allyn liner Incendiary arrived from Vancouver on August 6, and put ashore her cargo of general merchandise. The steamer had a plume of smoke coming from her funnel, indicating a fire on board. Leaving Vera, however, the steamer was disabled by running aground on the main bar of that port. The Union Company's steamer Allyn, which was en route to Seattle, learned of the disaster, and made several attempts to reach the stricken vessel. After being unable to do so, she sent a tugboat to tow the ship off, but without success. After waiting some hours on the coast the steamer was got off and returned to Vera.

COUNTRY NEWS.

RACE SUICIDE.

QUARTER SESSIONS.

At the Quarter Sessions, before Acting Judge Deane, William Little and John Taylor were acquitted on a charge of sheep stealing, and John Michael Davis on a serious charge.

CLIFTON, Tuesday.
Work was not resumed at the South Clifton Colliery owing to a strike today in the district of parts required for repairs. Everything is expected to be in readiness for resumption of work on Wednesday morning. The breakage of machinery has caused a loss of five days to the colliery.

A heavy sea which set in on Sunday night prevented shipping at Cliff Colliery. A steamer came alongside early this morning and took a full cargo of coal.

GRATTON, Tuesday.
Six sailing vessels are berthed to load hardwood on the Clarence River for New South Wales. This industry has enormously increased of late, by reason principally of the opening of the Graciosa-Clarence railway.

WELLINGTON, Tuesday.
The weather is dull, with cold winds. The election is proceeding steadily. There is more interest than on former occasions, owing to the issues involved and the local opinion.

WELLINGTON, Tuesday.
Mr. Norman Barnes, who has left for London, was on Monday the recipient of a presentation from employees of the Wellington Co-operative Stores, with which he has been associated.

WOLLONGONG, Tuesday.
A manual training school has been established in connection with the Illawarra Teachers' Association.

CASUALTIES.

A FATAL FALL.
At a late hour on Monday night the Civil Ambulance Brigade was called to a house in the suburb of Hurstville, where they found that William Hill, 45, a dealer, who resided on the premises, had fallen down stairs, and had sustained severe injuries to the head. He was conveyed to the Sydney Hospital, but on arrival at that institution life was pronounced extinct.

How Hill came to fall down the stairs could not be ascertained. It was stated that he arrived home about 11.30, and shortly after that time his son heard him fall, and on going to investigate the father found him lying on an unconscious condition.

COAL-LUMPER INJURED.
John McGuinness, 44, coal-lumper, residing in Church-street, Hurstville, while working on the coal wharf at Darling Island on Saturday was struck by a large piece of coal that fell from a railway wagon and severely injured. He was removed to the Sydney Hospital by the Civil Ambulance and admitted, suffering from crushed ribs.

RUN OVER BY A LOBBY.
Anasias Nelson, 34, residing in Bulweria-road, Pyrmont, attempted to get on a lobby on Saturday, but tripped and fell, and one of the wheels passed over his right thigh, fracturing a bone. He was removed to the Sydney Hospital by the Civil Ambulance and admitted.

ACCIDENT IN THE FOOTBALL FIELD.
Thomas Cook, 19, residing in Bannister-street, Pyrmont, whilst playing football at Sydney Park on Saturday afternoon, was struck by another player, and received serious injuries to his back. The Civil Ambulance took him to St. Vincent's Hospital, where he was admitted.

FELL OUT OF A TEAM.
Mary Ann Maddock, residing at 38 Express-moat-street, Pyrmont, fell out of a team in George-street, near the Central Railway Station, on Saturday night, and received lacerations of the forehead. She was conveyed to the Sydney Hospital by the Civil Ambulance.

KICKED BY A HORSE.
MURWILLUMBIDGI, Tuesday.
A son of Mr. J. Murwillumbidgee, who was head of a horse, and sustained a compound fracture of the skull yesterday. The operation, of trepanning, and the little fellow is now much better.

ACCIDENTAL DEATH.
WARWICK, Sunday.
A boy named Alfred Robt. aged 15, from Sydney, in the employ of J. Marshall, at Glenahilly, was killed yesterday through the accidental discharge of a gun.

FATAL DRIVING ACCIDENT.
URALLA, Friday.
Mr. William H. Purcell, of Gwyndolene, Uralia, died last night from the effects of being thrown from his buggy some time ago. Mrs. Purcell, his wife, also had an arm broken.

SLIPPED FROM A WALL.
BEGA, Sunday.
Charles J. Smith met with a painful accident at the Bega Co-operative Creamery Company's factory on Thursday afternoon. A brick fell on his head, and he was taken to the hospital.

BEATING BREAKS.
KIAMA, Saturday.
Mr. Jones, chairman of the Kiama dairy butter factory, met with a nasty accident yesterday. Just after starting the machinery in readiness for the day's work, he fell while driving the large churn, and, on cutting struck Mr. Jones just under the eye, ending his cheek and bruising his head.

A YOUNG WOMAN DROWNED.
HOBART, Sunday.
An inquest was held at Portville yesterday into the cause of the death of Miss A. Allen, aged about 25, who was found drowned in Sagard River on Thursday. Deceased had been staying with a brother-in-law, Mr. A. Robt. at Launceston, for the past six months, and was returning to her home at Portville on Saturday morning.

ACCIDENT AT A QUARRY.
WOLLONGONG, Tuesday.
Charles Jackson, employed at the Port Kembla Quarries, while working on Saturday afternoon, slipped, and fell a distance of 10 ft., breaking his leg.

COLLISION.
BARRABA, Tuesday.
W. Condon, with his wife and child, was driving in a sulky on Sunday, when it collided with a wagon. The wife escaped, but the child was seriously injured, and its condition is critical.

EXPLOSION AT A MINE.
WEST WATLONG, Monday.
The heavy report of an explosion such as has not been heard on this field previously caused much excitement on Sunday afternoon. It was at once reported that a serious accident had occurred in the West Mine, and being Sunday afternoon people from all directions had hurriedly to the spot. Fortunately, the explosion was not from the boiler, but resulted from the bursting of a heavy pipe on the surface, forcing out the powerful compressed air rock-drilling plant. No one was injured, but some delay and considerable expense have been caused by the accident.

ALARMING ALLEGATIONS.

A NATIONAL PERIL.

Following are some further extracts from the report of Mr. O. C. Beale, appointed by the Royal Commission by the Commonwealth Government to inquire into certain matters connected with the sale of patent medicines, etc.

"We cannot ignore the direct evidence upon the use of poisons, and the evidence of reckless use of poisons. Where the woman told the police voluntarily that she had taken 2000 baby lives without losing more than one mother's life, the former part is credit to the latter (improbable in the extreme). There is the instance of the Sydney doctor already quoted, who has been prosecuted many times for murder, and who is reported to kill fifty mothers a year, of whose deaths two surgeons on the Royal Commission knew at least twenty each. And there are no grounds for believing that 2000 or 3000 homicides are an extraordinarily high number for one practitioner."

"The senior-constable has been entrusted by the Commissioner of Police in New South Wales with the investigation, during years, late the previous year, of the conditions in the city and suburbs of Sydney. Examined before the Royal Commission under the Deeds of the Birthrate, he stated that, within the particular district under his care, he knew personally of 30 persons engaged continually in the practice, instrumentally and otherwise. When required to give an estimate of the probable number of persons in the metropolitan area who were known to occupy themselves as their manner of living in practicing this he said he was positive that the number exceeded 100."

"Three years ago a leading gynaecologist of Sydney told the Royal Commission named above that he had himself known twenty women who had their lives in conditions induced by one well-known malpractice of the city. Another surgeon of the Commission said he had known more than twenty women killed by the same person, who was reported to lose fifty such lives a year."

"Unless the progress of decay can be in some way arrested, or counteracted by the saving of life, or both, the birth and death rates must approximate in measurable time, and the birth-rate will be pronounced as the two, as seen amongst the native-born in Rhode Island and some other Anglo-Saxon communities. That is to say, unless the spread of unnatural practices—generous frauds—checked by moral and laws, and together with actual, active State protection of life and health—foetal, infantile, adolescent, and adult—our nation is doubtless its doom in full view. Morals and laws ought to be interdependent terms—the two a piousness—but in that delicate matter of the birth-rate, the latter is essential and irrefragable antagonism."

"To May, 1906, on page 1359, the editor of the 'Lancet' in a thoughtful article, remarks: 'The birth-rate in the Australian is higher than that of France, and unless the British become more careful, it is doubtful whether the British Empire will long remain British in anything but name.'"

"President Roosevelt said to me," continues the Commissioner, "Do you know that there are fewer doctors in Australia than in the United States? I have been told that there were 5000 in the United States, and upon another occasion he said to me, 'We must either have our way or we must make way for the other race. Asiatic or whatever they are, that will be the end of us. His race is our race, and his trouble our trouble. He will know that up to the present physical degeneracy is not the active cause. He knows and declares that it is unnatural interference and actual homicide. Exactly the same cause that is operated to ruin ancient Rome are operating on our race, and the very methods employed are the same.'"

The Commissioner also quotes the following extract from the report of the former Royal Commission:—"We have received ample evidence to believe that the number of persons—and wives, nurses, lyman-in-home keepers, and others, including some few medical practitioners—obtaining the business of malpractice is not only large, but is increasing; and that they carry on this business with comparative impunity, owing to the inherent difficulty of obtaining sufficient evidence for conviction of this form of crime."

OPINIONS OF DOCTORS AND CHEMISTS.
The report of Commissioner Beale in regard to patent medicines, etc., is a most interesting and a good deal of comment, and in none of its phases has it been more discussed than that which has a bearing upon the question of "race suicide."

It is understood, of course, that there have been merely the re-statement of an old problem—a problem, however, which loses none of its national seriousness by reason of its age. The matter was made the subject of inquiry among medical men and chemists, and the consensus of opinion everywhere was that though it was eminently desirable that the trade in deleterious drugs and certain apparatus should be checked, still to quite obliterate the evil was apparently hopeless. Mr. Hamlet, the Government Analyst, speaking from observations upon tests made in his laboratory, entirely endorsed Mr. Beale's condemnation of certain preparations as dangerous to life, while being in most cases useless for the purposes for which they are sold.

"Legislation might check the evil by restricting the sale of certain drugs, and certain apparatus might be checked, still to quite obliterate the evil was apparently hopeless. Mr. Hamlet, the Government Analyst, speaking from observations upon tests made in his laboratory, entirely endorsed Mr. Beale's condemnation of certain preparations as dangerous to life, while being in most cases useless for the purposes for which they are sold."

THE COMMISSIONER ALSO QUOTES THE FOLLOWING EXTRACT FROM THE REPORT OF THE FORMER ROYAL COMMISSION:—"We have received ample evidence to believe that the number of persons—and wives, nurses, lyman-in-home keepers, and others, including some few medical practitioners—obtaining the business of malpractice is not only large, but is increasing; and that they carry on this business with comparative impunity, owing to the inherent difficulty of obtaining sufficient evidence for conviction of this form of crime."

THE COMMISSIONER ALSO QUOTES THE FOLLOWING EXTRACT FROM THE REPORT OF THE FORMER ROYAL COMMISSION:—"We have received ample evidence to believe that the number of persons—and wives, nurses, lyman-in-home keepers, and others, including some few medical practitioners—obtaining the business of malpractice is not only large, but is increasing; and that they carry on this business with comparative impunity, owing to the inherent difficulty of obtaining sufficient evidence for conviction of this form of crime."

THE COMMISSIONER ALSO QUOTES THE FOLLOWING EXTRACT FROM THE REPORT OF THE FORMER ROYAL COMMISSION:—"We have received ample evidence to believe that the number of persons—and wives, nurses, lyman-in-home keepers, and others, including some few medical practitioners—obtaining the business of malpractice is not only large, but is increasing; and that they carry on this business with comparative impunity, owing to the inherent difficulty of obtaining sufficient evidence for conviction of this form of crime."

THE COMMISSIONER ALSO QUOTES THE FOLLOWING EXTRACT FROM THE REPORT OF THE FORMER ROYAL COMMISSION:—"We have received ample evidence to believe that the number of persons—and wives, nurses, lyman-in-home keepers, and others, including some few medical practitioners—obtaining the business of malpractice is not only large, but is increasing; and that they carry on this business with comparative impunity, owing to the inherent difficulty of obtaining sufficient evidence for conviction of this form of crime."

INDIGESTION.

"The little I ate caused me dreadful pain. Dr. Williams' Pink Pills perfectly cured me of indigestion," said Mrs. Caroline Hampson, 30 Allen-street, Pyrmont, Sydney, in an interview.

Dr. Williams' Pink Pills

Indigestion because they make new, rich blood, which feeds and strengthens the weak, starved organs and makes them work in a healthy way. New blood sharpens the appetite, strengthens the stomach, stimulates the liver, regulates the bowels, soothes the nerves, gives energy, and banishes dyspepsia for ever.

SYMPTOMS OF INDIGESTION:

PAIN IN THE CHEST AND UNEASINESS AFTER EATING. WIND, HEARTBURN, VOMITING, FOOD LIKE A LUMP IN THE STOMACH, DESPONDENCY, FEELINGS OF IMPENDING PERIL.

Here is proof that Dr. Williams' Pink Pills cure Indigestion, in the words of a Sydney woman—

"About two years ago my health in general was very much run-down," said Mrs. Hampson. "I always had a tired and languid feeling. I had very little appetite. No matter how little I ate it would cause me dreadful pains in the chest. There a lump would settle, and would neither go up nor down. This lump seemed as heavy as could be. Then the pain would settle between my shoulder blades, and if I took a deep breath a sharp, shooting pain would catch me right across the body, as if I were being cut in two."

"I received no relief from the doctor. I often heard the neighbours speak well of Dr. Williams' Pink Pills, so I decided to try them. After the first box I was greatly relieved of the pain in the chest. My appetite was better, and I was not half so tired. By the time that I had gone through four boxes of Dr. Williams' Pink Pills I felt well, I was perfectly cured of Indigestion, and I have remained cured ever since."

YOU WILL FIND THAT DR. WILLIAMS' PINK PILLS ARE THE BEST TONIC IN THE WORLD. BY MAKING NEW BLOOD AND TONING THE NERVES THEY HAVE CURED, AS TESTIMONY WILL PROVE,

Anaemia
Indigestion
Rheumatism
Paralysis
